REPORT OF EXTENSION ACTIVITIES

Organized by

Department of English
Purbanchal College, Silapathar

Title of the Programmes/Extension Activity: *"Future of English Language with Artificial Intelligence."*

Venue: - Ramyapur M.V. School, Kulibazar.

Date of Programme/Activity: 08/05/2026.

Total Participants in the Programme/Activities: 74 (Seventy four).

Introduction: As requested by Mr. Bhupen Lahon, the Head of English Department of Purbanchal College, Silapathar the Awareness Programme is chaired by Mr. Ramendra Mandal, the respected Head Master of Ramyapur M.V. School, Kulibazar.

Objectives: Mr. Lahon told that Artificial Intelligence made a remarkable mark in the global arena and in every field of activities. And English language also is highly impacted by the use of AI. Keeping in mind the uses of AI in modern day task we are committed to aware the upcoming generation regarding the proper use of AI in day to day activity.

Outline about the Activity/Programme: Dr. Udeep Boruah, Assistant Professor, Department of English, Purbanchal College, Silapathar delivered a speech on "Future of English language with Artificial Intelligence" in front of the house. His speech focused on how AI is influencing the way we learn English. Artificial Intelligence has become one of the most transformative technologies of the century. It is rapidly influencing education, communication, translation, content creation, and language learning. The English language, being the most widely used international language, is significantly affected by AI-powered tools such as chatbots, virtual assistants, translation software, grammar checkers, and language-learning applications.

AI systems can understand, generate, translate, and analyze English with remarkable accuracy. Applications such as ChatGPT, Grammarly, Duolingo, and speech-recognition systems help users improve grammar, pronunciation, vocabulary, and writing skills. AI also enables personalized learning experiences by adapting lessons according to the learner's needs and performance. Research indicates that AI-supported language learning can provide real-time feedback, adaptive instruction, and enhanced opportunities for language practice.

He also spoke in detail about the positive impacts of AI on English Language like Personalized Learning, Instant Feedback, Accessibility to AI tutors available 24/7, Improved Communication, Content Creation etc.

On the other hand another speaker Dr. Bijoy Deb, Asst. Prof., Department of English Purbanchal College, Silapathar put forward his views on the negative

impact of extensive use of AI tools. Overdependence on technology which may make students rely excessively on AI instead of developing their own language skills. Frequent use of AI-generated content may result to reduced creativity which may limit original thinking and creativity. He was of the view that it may create academic integrity issues and AI can be misused for plagiarism and completing assignments without genuine learning. More use of AI in any form of language creates immense possibility of loss of human interaction. He also mentioned that Language learning depends on social communication, which AI cannot fully replace. In his concluding remarks Dr. Deb told that the future of English with AI is likely to be collaborative rather than competitive. AI will serve as an intelligent assistant for learners and teachers, while human educators will continue to provide creativity, emotional support, cultural understanding, and critical thinking guidance. He suggested that AI will augment language education rather than completely replace teachers.

Outcomes of the Activity/Programme: The programme is found very important and relevant by the students of the school. The school Authority and the students present there have highly applauded the programme and they expect such more programmes in the future.

Concluding Remarks: The chairperson highly appreciates the programme. In his concluding remarks he stated that Artificial Intelligence is reshaping the future of the English language. While it offers numerous benefits such as personalized learning, instant feedback, and greater accessibility, it also presents challenges related to dependency, creativity, and ethics. The most effective future will be one in which AI and human intelligence work together to enhance language learning and communication. He thanked all the students present there including the English department of Purbanchal College, Silapathar.
